Assess your organization's dark data risks with Compliance Check

Participate in an immersive, hands-on learning experience

Explore recommendations and next steps

"Privacy, security, and compliance are critical... With Microsoft 365, we have improved our ability to manage security and protect our data and intellectual property." -Sherry Neubert, CIO, Goodyear Tire & Rubber Company

Not long ago, managing data just meant dealing with documents and emails. Pervasive digital technology has greatly expanded the information universe with messaging, videos, images, and IoT. Data is exploding, and regulations are increasing. Both contribute to increased risk exposure.

Address compliance risks head on

Protecting information—wherever it goes—is critical to ensuring trust and meeting compliance requirements. But first, you need to know what data you have, where it is, how it's being used, and compliance risks that may exist.

The **Compliance Workshop** gives you the insights you need to better discover, protect and govern your corporate data.

As your business-critical data expands, having an integrated approach to compliance is more important than ever.

By attending this workshop, our experts will work with you to:

Document your compliance objectives and strategy

Show how to understand, prioritize, and mitigate potential compliance risks

Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies

Provide actionable next steps based on your needs and objectives

Compliance Check uncovers data risks

This on-site engagement is spread out over several weeks to allow Compliance Check time to run on top of your cloud infrastructure and surface data risks within your organization. Compliance Check leverages automated Microsoft 365 tools and services to discover data stored in the Microsoft cloud and identify potential problem areas.

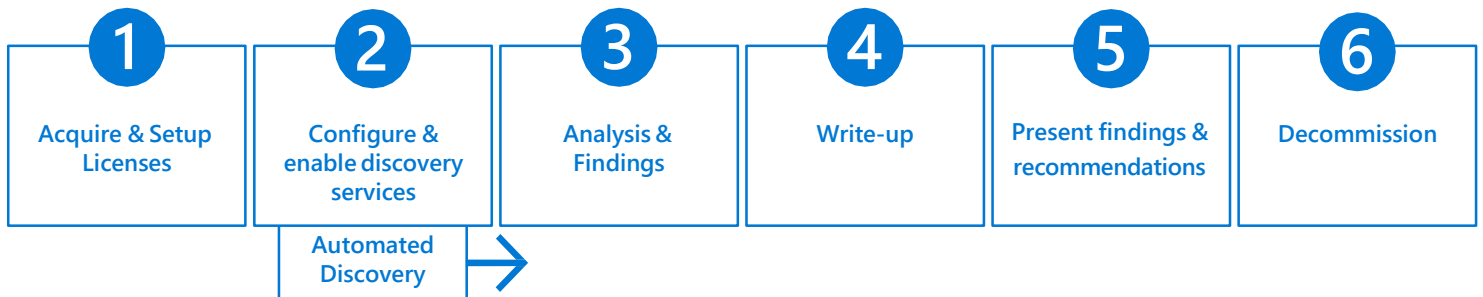

The automated discovery process will analyze your existing data for:

- Sensitive information and intellectual property
- Unused or "stale" data
- Unusual activities

Compliance Check

Our 6-step approach to discovering and reporting on dark data compliance risks

Compliance Workshop

What to expect

By the end of this workshop, Microsoft Compliance experts will provide you with a:

- Compliance Check report that includes findings and insights from the automated discovery process
- List of actionable recommendations and suggestions for improved mitigation and governance
- Detailed assessment of your IT and compliance priorities and initiatives
- Clear look into Microsoft's approach to compliance and how it relates to your organization
- Hands-on opportunity to experience what integrated compliance looks like, including the latest tools and methods
- Set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps

Why Bulletproof?

When it comes to compliance, you need an experienced partner.

Bulletproof combines its experience in compliance, information management, Office 365, and security to provide you with the holistic view you need to strengthen your compliance and information security position. Our experts will guide you through the whole process from initial discovery, assessment and planning, through implementing solutions, and on to monitoring and improvement.

Named 2019 Partner of the Year | Modern Workplace by Microsoft Canada, Bulletproof is proud to be a Microsoft Gold Partner with ten gold competencies.
